Experience

Equifax Inc, I-9 HQ – Workforce Solutions *Thiruvananthapuram, Kerala*
Software Development Engineer II Nov 2026 – Present

- Own features end-to-end across Java/Spring Boot microservices and Angular front ends – technical design, implementation, validation, and production release.
- Drive AI-assisted development (AI SDLC) to accelerate delivery while retaining ownership of architecture and enforcing engineering standards through rigorous code review before integration.

Software Development Engineer I July 2025 – Oct 2026

- Named **Best Performer** three consecutive quarters (Q4 2025 – Q2 2026).
- Built, and shipped the platform's first integrated training solution: a greenfield Angular micro-frontend and SCORM-compliant learning portal with dynamic routing, sandboxed content playback, server-side completion verification, and rate limiting.
- Led platform-wide I-9 Anywhere Plus amendments (10K+ I-9's weekly) across multiple services and teams – Section 2 and Supplement B updates, bilingual PDF generation, and secure remote amendments.
- Delivered deadline-driven compliance and regulatory changes across microservices, ensuring accurate employer documentation ahead of USCIS enforcement dates.

Technology Engineer Intern Feb 2025 – June 2025

- Rotated across software development, Site Reliability Engineering, and test automation, working on enterprise delivery pipelines and infrastructure operations.

Nissan Digital *Thiruvananthapuram, Kerala*
Software Developer Intern July 2024 – Dec 2024

- Migrated a legacy .NET Framework 4.5 desktop app to a .NET Core backend with an Angular frontend, building REST APIs and queue-based workflows to offload resource-intensive processing to the server.

Projects

Continuum Home – Personal Data Platform | ***Next.js, TypeScript, Firebase*** 2026
github.com/fal3n-4ngel/Continuum-Home

- Built and self-host a personal data platform for expenses, investments, media, books, and subscriptions with 30+ registered users.
- Exposed a unified OpenAPI 3.1 interface secured with OAuth 2.0 for AI assistants; implemented AES-256-GCM encryption, per-user Firestore isolation, Redis caching, request validation, and audit telemetry.

Monolith – Multi-App Audit Platform | ***Java, Spring Boot, BigQuery, Cloud Run*** 2026
github.com/fal3n-4ngel/Monolith

- Built a centralized audit service with a single pipeline to ingest, process, and query audit events across applications, with app-scoped ingestion, payload validation, rate limiting, async processing, and parameterized reporting for data isolation.

DASH – Distributed Adaptive Serverless Hosting | ***Tauri, Next.js, Firebase*** 2025
github.com/fal3n-4ngel/Dash-Desktop

- Built a peer-to-peer system for running serverless functions across nodes, with an adaptive scheduler assigning tasks by node availability and resource utilization.

Education

Mar Baselios College Of Engineering and Technology *Thiruvananthapuram, Kerala*
B.Tech in Computer Science (CGPA: 8.33) June 2025

Technical Skills

Languages: Java, Python, TypeScript, JavaScript, C#, SQL
Backend: Spring Boot, Spring Security, JPA, .NET, Node.js, REST, OAuth 2.0, OpenAPI
Frontend: Angular, React, Next.js, Tailwind CSS
Cloud & DevOps: GCP, Kubernetes, Docker, Argo CD, Cloud Run, AWS, Firebase
Data & Systems: PostgreSQL, MySQL, BigQuery, Firestore, Redis, Distributed Systems

Awards & Certifications

Google Cloud Certified: Associate Cloud Engineer, Generative AI Leader
Web3 for India 2023 Winner: BlockHash – Kerala Blockchain Academy
